

MESSAGE OF THE ICREPQ SC CHAIRMAN

Dear Colleague,

It is our great pleasure to invite you to **ICREPQ'21- “19th International Conference on Renewable Energies and Power Quality”**, to be held in Almeria, Spain, from 28th to 30th July 2021.

Due to the rapid development of the COVID-19 contagious cases all over the world we have decided that in this edition the conference will be held in face-to-face and in on-line modes. In any case, we hope that the virus, or the vaccine, permit us to see you in-person.

This Conference, now in its 19th edition, is the major International Conference devoted entirely to renewable energies and power quality. Started in Vigo in 2003, is now established as a regular annual event.

Very successful ICREPQ conferences were held in Vigo (2003), Barcelona (2004), Zaragoza (2005), Palma de Mallorca (2006), Sevilla (2007), Santander (2008), Valencia (2009), Granada (2010), Las Palmas de Gran Canaria (2011), Santiago de Compostela (2012), Bilbao (2013), Córdoba (2014), La Coruña (2015), Madrid (2016), Malaga (2017), Salamanca (2018), Tenerife (2019) and Granada (2020). Now we want to organize a very unforgettable conference in the University of Almeria.

This Conference, like its predecessors, is a forum for specialists engaged in the fields of renewable energies and power quality, can discuss current progress and future developments and trends in these two important areas, and also in those topics like: electric vehicles, electrical machines and drives, power electronics, control strategies, monitoring and diagnostics, etc, that are connecting with they. For to exchange information and experience of developments, trends and applications, from researchers, academics and professionals. Topics related to practical applications, operations, maintenance and teaching are also highly encouraged.

You are strongly encouraged to participate and submit papers to the ICREPQ'21 Conference for regular and special sessions. Potential authors and other interested participants are most welcome to visit and discover the information of our conference web page. English will be the working language for all printed material, presentations and discussions.

If you attend to ICREPQ'21 then you can visit the Alcazaba and other monuments and, also, the Solar Platform of Almeria that is the largest concentrating solar technology research, development and test centre in Europe.

I would appreciate if you could send this information to Colleagues of yours that might be interested.

Thank you very much for your interest and collaboration and I hope forward seeing you in Almeria.

With my best wishes,

Manuel Pérez Donsión

Chairman of the ICREPQ Steering Committee
Full Professor of Vigo University
