

## MESSAGE OF THE ICREPQ SC CHAIRMAN

**Dear Colleagues,**

It is our great pleasure to invite you to **ICREPQ'23 "21<sup>th</sup> International Conference on Renewable Energy and Power Quality"**, to be held in Madrid, Spain, from 24<sup>th</sup> to 26<sup>th</sup> of May 2023.

We hope that the vaccines will permit the COVID-19 control all over the world for the year 2023. In any case, we have decided that in this 23<sup>th</sup> edition the conference will be held mainly in face-to-face mode, but also online.

The ICREPQ is the major International Conference devoted entirely to renewable energy and power quality. Started in Vigo in 2003, is now established as a regular annual event that in this 21<sup>th</sup> edition, after 20 years from its beginning, goes to Madrid, city where the ICREPQ conference has already been held in 2016 (ICREPQ'16) with a great success.

Very successful ICREPQ conferences were held in Vigo (2003), Barcelona (2004), Zaragoza (2005), Palma de Mallorca (2006), Sevilla (2007), Santander (2008), Valencia (2009), Granada (2010), Las Palmas de Gran Canaria (2011), Santiago de Compostela (2012), Bilbao (2013), Córdoba (2014), La Coruña (2015), Madrid (2016), Malaga (2017), Salamanca (2018), Tenerife (2019), Granada (2020), Almeria (2021) and Vigo (2022). Now we want to organize a very unforgettable conference in the Universidad Pontificia de Comillas, Madrid.

This Conference, like its predecessors, is a forum for specialists engaged in the fields of renewable energies and power quality, can discuss current progress and future developments and trends in these two important areas, and also in those topics like: electric vehicles, electrical machines and drives, power electronics, control strategies, monitoring and diagnostics, etc, that are connecting with them. For to exchange information and experience of developments, trends and applications, from researchers, academics and professionals. Topics related to practical applications, operations, maintenance and teaching are also highly encouraged.

You are strongly encouraged to participate and submit papers to the ICREPQ'23 Conference for regular and special sessions. Potential authors and other interested participants are most welcome to visit and discover the information of our conference web page. English will be the working language for all printed material, presentations and discussions.

If you attend to ICREPQ'23 then you can visit the city of Madrid, the capital and largest city of Spain. Madrid has a wide cultural offer, thanks to a rich culture heritage. The city has a lot of monuments that have become in a symbol for the city: the Cibeles Fountain (la fuente de La Cibeles), Neptuno Fountain, Alcalá Gate (la Puerta de Alcalá), Sol Gate (La Puerta del Sol)... You will love to walk along the streets and discover all of them: gardens, parks, palaces, charming buildings, historical places...

The papers presented at the ICREPQ'23 will be published in the open access "**Renewable Energies and Power Quality Journal (RE&PQJ)**", ISSN: 2172-038X, with DOI (*Digital Object Identifier*) by CrossRef, and they will be indexed by SCOPUS. On the other side, like it's traditional, the high quality research papers presented at the ICREPQ'23 will be selected for to be published like chapters of one **ICREPQ-Book** that usually publish Cambridge Scholars Publishing.

I would appreciate if you could send this information to your colleagues that might be interested, spreading it using your email address list.

Thank you very much for your interest and collaboration and I hope forward seeing you in Madrid.

With my best wishes,

**Manuel Pérez Donsión**

Chairman of the ICREPQ Steering Committee  
Full Professor of Vigo University
